Professional Summary

Web developer and designer building secure, responsive client sites on everything from WordPress and Webflow to fully custom sites coded from scratch in HTML, CSS, JavaScript, and React. Turns Figma designs into SEO-optimized, mobile-first websites, builds data-driven dashboards, and runs the web design brand Pixel Designs, while maintaining a 4.0 GPA in Web Design & Development.

Work Experience

Web Developer — Pixel Designs *2023–Present*

- Design, build, and launch websites for small businesses and organizations, managing each project end to end: client discovery, Figma mockups, development, deployment, and post-launch support.
- Built 40+ websites, from client and small-business sites to self-directed builds across multiple niches, using WordPress, Webflow, and custom HTML/CSS/JavaScript.
- Harden client site security with custom HTTP security headers, raising one client's Beagle Security score from 21 to 68.
- Build interactive dashboards and web apps that turn data into clear, usable views.
- Doubled a client's conversion rate within one month by optimizing on-page SEO (meta data, H1 structure, page copy) and tracking results in Google Analytics.

Manager — Big Whiskey's *2020–2023*

- Managed scheduling, inventory, ordering, and cash handling; cut monthly labor costs by roughly 15% through more efficient scheduling.

Project Manager / Sales — Restore Masters *2017–2020*

- Prepared and documented insurance supplements to recover additional project costs.
- Managed up to 8 concurrent roofing projects, coordinating crews, subcontractors, material deliveries, and schedules.
- Built the company's website and online presence, increasing visibility and client acquisition.

Event Coordinator — Piropos Restaurant *2015–2016*

- Coordinated events, employee scheduling, reservations, and supplies.

Projects

Client Website — Seely's Site (Pixel Designs Client) — blincoechad.github.io/SeelysSiteBuild/

- Built and maintain a static HTML/CSS client site; hardened security headers in vercel.json and added Speed Insights.

Website Redesign — Ott's Off-Leash Dog Sanctuary — blincoechad.github.io/PottsDogWebsite

- Rebuilt the sanctuary's Wix site as a fully hand-coded, responsive redesign, presented to the client as a proposed upgrade.

Web Applications — From Program Logic to Working Code — github.com/Blincoechad

- Map out each program's logic, code it in JavaScript or Python, and give it a clean, responsive visual front end.
- **Dough Flow** — budgeting web app built around a weekly paycheck (live app).
- **JobFisher** — Python/Flask dashboard that pulls listings from 4 job APIs, ranks the top matches against a resume, and is covered by 23 automated tests (github.com/Blincoechad/JobFisher).
- **MyPrograms** — 8 interactive JavaScript programs, each with its own live page: /ToDo, /Clock, /rockPaperScissors, /colorTranslator, /dogToHumanYears, /CountDownImageArray, /VideoFeed, /iphoneMenuProgram.

Collaborative Project

Vanguard AI — Risk Intelligence Dashboard | Front-End Lead, Four-Person Team — GitHub Repo

- Built an AI dashboard for Venatore that pulls news and SAM.gov data and uses an LLM to flag and score emerging risks.
- Led front-end design and development, from Figma mockups to severity badges, light/dark themes, mobile layouts, and source-reliability safeguards; rebuilt the UI from React/Vite to Flask/Jinja2 after a mid-project stack change.
- Presented the finished product to Venatore's board, competing against other teams for open positions with the company.

Technical Skills

- **Languages & Frameworks:** HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap, Python, Flask/Jinja2, SQL/SQLite, REST APIs
- **Website Platforms:** WordPress, Elementor, Webflow
- **Design & Prototyping:** Figma, Adobe Photoshop, Illustrator
- **Tools & Practices:** Git, GitHub, Vercel, Website Security Hardening, Responsive Design, Accessibility, SEO (Semrush)
- **Other:** Google Analytics, Project Management, Client Relations

Education & Achievements

A.S., Internet Services Technology (Web Design & Development) — Hillsborough Community College

Expected 2027 | GPA 4.0 | Professor nomination for Student Excellence Award

Certifications: Webflow, JavaScript Programming, Project Management — *certificates available upon request*

Professional and business references available upon request.
